actual sport

Malik **BOUANANI** & Christophe **BARRERE**

Cohort 27 – Holberton School · Toulouse

Project Description

Web application for Actual company

- Booking system for group sports classes
- Limited spots per session

Employee Features:

- Browse available sessions
- View time, description, remaining spots
- Reserve & pay online (Stripe)
- Personal dashboard

User Types: Employees | Admins

Fully Responsive: Desktop | Tablet | Mobile

Live Demo
Booking Flow

Technologies Used

Payment:
- Stripe

DevOps:
- Docker

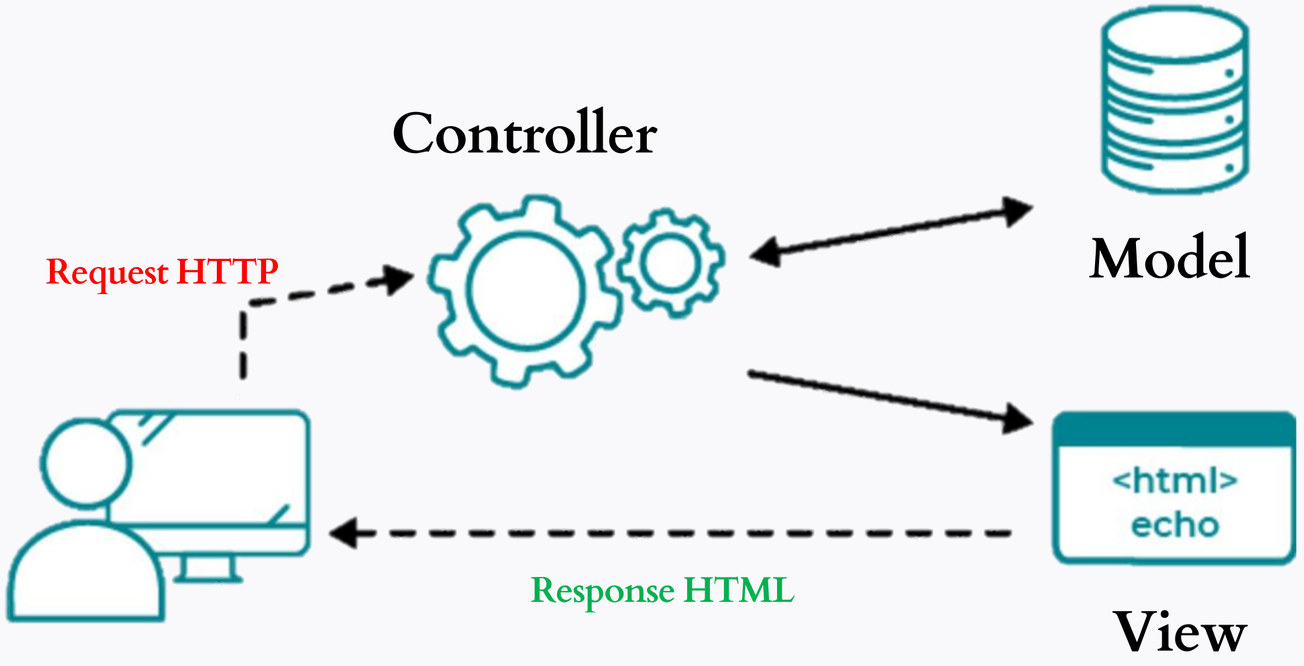
Frontend:
- Twig Templates

Backend:
- Symfony 6.4
- PHP 8.1

Database:
- Doctrine ORM
- MySQL 8

Architecture

MVC Architecture



Core Algorithm

```php
$connection = $em->getConnection();
$connection->beginTransaction();

$registration = new Registration();
$registration->setUser($user);
$registration->setSession($session);
$registration->setStatus('confirmed');
$registration->setRegisteredAt(new \DateTimeImmutable());

$payment = new Payment();
$payment->setUser($user);
$payment->setRegistration($registration);
$payment->setAmount($session->getCourse()->getPrice());
$payment->setStripePaymentId($stripeSessionId);
$payment->setCreatedAt(new \DateTimeImmutable());

$session->setAvailableSpots($session->getAvailableSpots() - 1);

$em->persist($registration);
$em->persist($payment);
$em->persist($session);
$em->flush();
$connection->commit();
```

Error Handling:
```php
if ($connection->isTransactionActive()) {
    $connection->rollBack();
}
```

Collaboration & Timeline

Collaboration Tools

GitHub
- main branch (stable code)
- Feature branches
- Pull Requests + Code Review

Discord
Daily communication

Project Timeline

Sprint 1
- Project setup
- Database design

Sprint 2
- Authentication
- Admin management

Sprint 3
- Booking flow
- Stripe integration

Sprint 4
- UI improvements
- Testing

Challenges

Technical Challenge: Stripe Integration

Problem: First time with Stripe • Redirect flow • Payment confirmation

Solution: Step-by-step testing in test mode • Edge case validation

Time Management Challenge

Problem: Features took longer than expected

Solution: Clear MVP focus • Priority on essentials • Daily check-ins

What We Learned

Technical Skills:
Complete Symfony app • MVC architecture • Payment integration • Database transactions

Professional Skills:
Team collaboration • Planning • Code review

Key Principles:
Clean architecture + safety checks = reliable application

Next Steps
Future Features

- Email Notifications
- Calendar View
- Analytics Dashboard
- Mobile Experience Improvements

Thank You
